About Bind Pharma

Since **2010**, Bind Pharma has been the preferred partner for clinics and distributors seeking precision-engineered medical instruments and clinical consumables.

Bind Pharma is a Turkey based supplier specialized in the needs of hair transplant clinics and aesthetic medical centers. We provide a wide range of medical instruments, sterile disposable products, PRP and mesotherapy products, operating room consumables and customized hair care solutions for clinics in many countries.

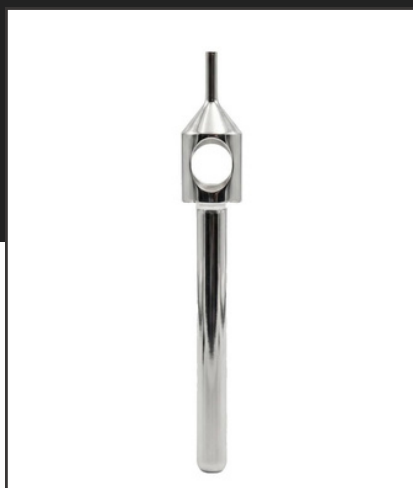

Our product portfolio includes FUE punches, DHI implanter pens, sapphire blades, PRP tubes, mesotherapy products and daily consumables used during hair transplant procedures. In addition to medical supplies, we can also create customized hair care sets under your clinic's own brand and provide experienced hair transplant teams when required.

We focus on offering reliable products, competitive prices and fast delivery. From our headquarters in Turkey, we are able to deliver most orders within one week and provide samples before ordering. Our goal is to become a long term and trusted supply partner for clinics looking for quality, speed and professional support.

Hair Transplant Instruments

①

Precision-engineered FUE Punches, DHI pens, sapphire pens and implantation tools and many more instruments designed for optimal graft survival and clinical efficiency

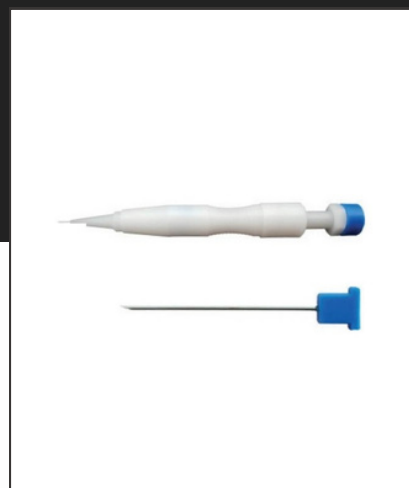

Fue Punches

Finest quality FUE punches manufactured in house from high grade stainless steel. Available in all diameters from **0.65** to **0.90** mm and lengths from 3 to 4 mm.

Forceps

Precision forceps designed for safe and accurate graft handling during hair transplant procedures. Lightweight, durable and easy to use.

Hair Implanter Pens

High quality DHI implanter pens available in different diameters. Designed for precise implantation and maximum graft survival.

Sapphire Blade & Holder

Sterile sapphire blades and holders designed for precise incisions with minimal tissue trauma and faster healing.

Handpieces

Ergonomic handpieces compatible with most micromotors. Lightweight design ensures comfortable and precise operation.

FUE Micromotors

Reliable and powerful FUE micromotors designed for smooth operation, high precision and long term clinical use.

Hair Transplant Instruments

②

Precision-engineered FUE Punches, DHI pens, sapphire pens and implantation tools and many more instruments designed for optimal graft survival and clinical efficiency
